

Bell-Ringer

Solve the equality:

$$3(x + 2) - 8 = 4$$

Solve and graph the inequalities:

$$-20 < 4x + 4 \leq -4$$

$$|2x - 8| + 4 \geq -2$$

Writing Equations:

1) passing through $(0, -8)$ and $(1, -4)$

2) if $f(-2) = 10$ and $f(0) = 4$

3) with a slope of $-3/4$ and a y-intercept of -8

Write the equation of the line passing through $(-2, -4)$ and $(-4, 2)$
